- BD Blue ventilation fan at it's finest
- Look out for the Big Dutchman's plastic pad sale
- Innovate: How to run YOUR farm from a hammock on the beach!
- News! Big Dutchman's BIG move.

EGG PRODUCTION NEWSLETTER VOL:2

A First-Of-Its-Kind layer facility in Welkom

Big Dutchman was pleased to be part of a project completed in Welkom where a 400 000 Layer facility was implemented. This project is the first of its kind in Africa with a double story 8 tier housing system that comfortable and safely accommodates birds.

As a fully environmentally controlled building Big Dutchman equipment enables the farmer to optimally utilise space while ensuring that his hens have fresh water, food, clean fresh air and room to act out normal hen behaviour such as scratching and foraging.

Big Dutchman Turnkey Solution at Onderstepoort

On the 8 October 2024 Big Dutchman, government officials and the Onderstepoort biological products officially opened a state-of-the-art vector-proof facility. Meeting stringent requirements for the building from the Department of Agriculture, Forestry and Fisheries (DAFF) as well as prioritising animal welfare

was the core foundation of our design. Ventilated using two Airprotec 20 000 which is an air filtered system used in Europe to prevent the spread of PRRS virus. The building will serve to support vaccine development in a controlled and safe environment, benefiting farmers around the country.

Big Dutchman # Blue

Big Dutchman Blue is a powerful ventilation tool that offers farmers a range of exciting benefits

Steplessly Variable.

As a steplessly variable fan and in combination with the Dynamic MultiStep exhaust air principle, currently the most energy-efficient solution for ventilating livestock buildings.

Pressure Resistance

With a high resistance to pressure of up to 100 Pa the Big Dutchman Blue ventilation system is able to maintain consistent airflow even under challenging conditions, such as when dust, feathers, or other debris partially block airways.

This ensures that fresh air is evenly distributed throughout the house, preventing dead zones where air might stagnate.

Direct Drive

The #BigDutchmanBlue is directly driven, with a stable connection between hub and blade for low maintenance requirements.

Plastic

Pad

Sale

Plastic & Paper Pads

We're excited to launch our Orange Dot sale on Cooling Pads and Ventilations with incredible prices on:

1.8m x 600 x 150 Plastic Pads

INNOVATE

#BigFarmNetFusion

Big Dutchman believes in thinking BIG! Think big about productivity, farm efficiency, and most of all, elegant farm management solutions.

Enter Big Farm Net Fusion!

This powerful farm management software offers pig, poultry and egg farmers a data-driven solution on your PC, tablet or even on your phone.

Having your farm data at your fingertips not only gives you instant information on a wide range of data, but also enables you to set up the automation of several critical farm management function. We've listed just a few of the farm management aspects covered by Big Farm Net Fusion.

#1: Ventilation and Climate Control

Set up ventilation and climate control alerts according to your farming specifications

#2: Feed levels

Set up automatic ordering with your local feed supplier. Once feed in the silos drops to a particular level (programmed by your farm management) an order is placed and you are alerted via Big Farm Net Fusion

#3: Transport Supplier

Big Dutchman Big Farm Net Fusion can be programmed to measure the size of your animals and notify your transport supplier as to the capacity needed for transport to market.

Whether you are managing your farm from your office or a hammock on a beach, Big Dutchman Big Farm Net Fusion gives you the ultimate data-driven control of YOUR farm.
