# Automatic feeders for piglet rearing and pig finishing

Big Dutchman offers dry feeders as well as wet feeders. Both are ideally suited for use in piglet rearing and/or pig finishing. All feeders can dispense pellets, crumbles or meal. Feed

can be supplied either manually or by any type of dry feeding system. The feeders can stand in the pen or be installed into the pen partition. All versions are easy to handle.

Let our experts advise you to find the best feeder for your barn!

## PigNic & PigNic-Jumbo for piglets for up to 40 or 70–80 weaners from 8 kg\*

### Advantages

- ✓ easy adjustment of the amount of feed to be dispensed;
- ✓ a 360° pivoted dosing mechanism ensures that the feed flows freely and can easily be operated by the pigs;
- ✓ a separate pipe for water circulation prevents deposits of vitamins or medication in the drinker pipe;

- ✓ a feed-saving collar keeps pigs from wasting feed;
- ✓ a small opening in the trough ensures that excess water can run off;
- ✓ the deep stainless steel trough is arranged at some distance above the ground to facilitate thorough cleaning underneath the trough;

## PigNic & PigNic-Jumbo finishing for up to 40 or 70–80 finishing pigs\*

- ✓ equipped with 2 or 3 drinking nipples;
- ✓ transparent 100 L or 200 L hopper;
- ✓ folding lid for quick monitoring;
- ✓ an agitator inside the hopper (optional) prevents feed bridging.

\* Regional regulations must be observed.

## PigNic:

10 million animal places worldwide and a staple for pig producers in the past 20 years!

### Farmer Tobias Hempen says:

When the piglets are weaned at three weeks of age, we want them to have easy access to the feed and to accept the feeder quickly and well. I am very happy with PigNic. The feeder is easy to adjust and feed conversion is perfect.

## MultiMax for pig rearing and finishing

- ✓ ad libitum dry feeder;
- ✓ the amount of feed to be dispensed can be adjusted easily;
- ✓ the special trough shape ensures ideal hygienic conditions and reduces feed wastage;
- ✓ made of stainless steel and plastic or entirely of stainless steel.

MultiMax made of stainless steel, with side walls made of plastic

MultiMax made of stainless steel

**For weaners from 6 to 30 kg**

- ✓ with 2 to 6 feeding places arranged on one or on both sides (2 to 12 feeding places in total).

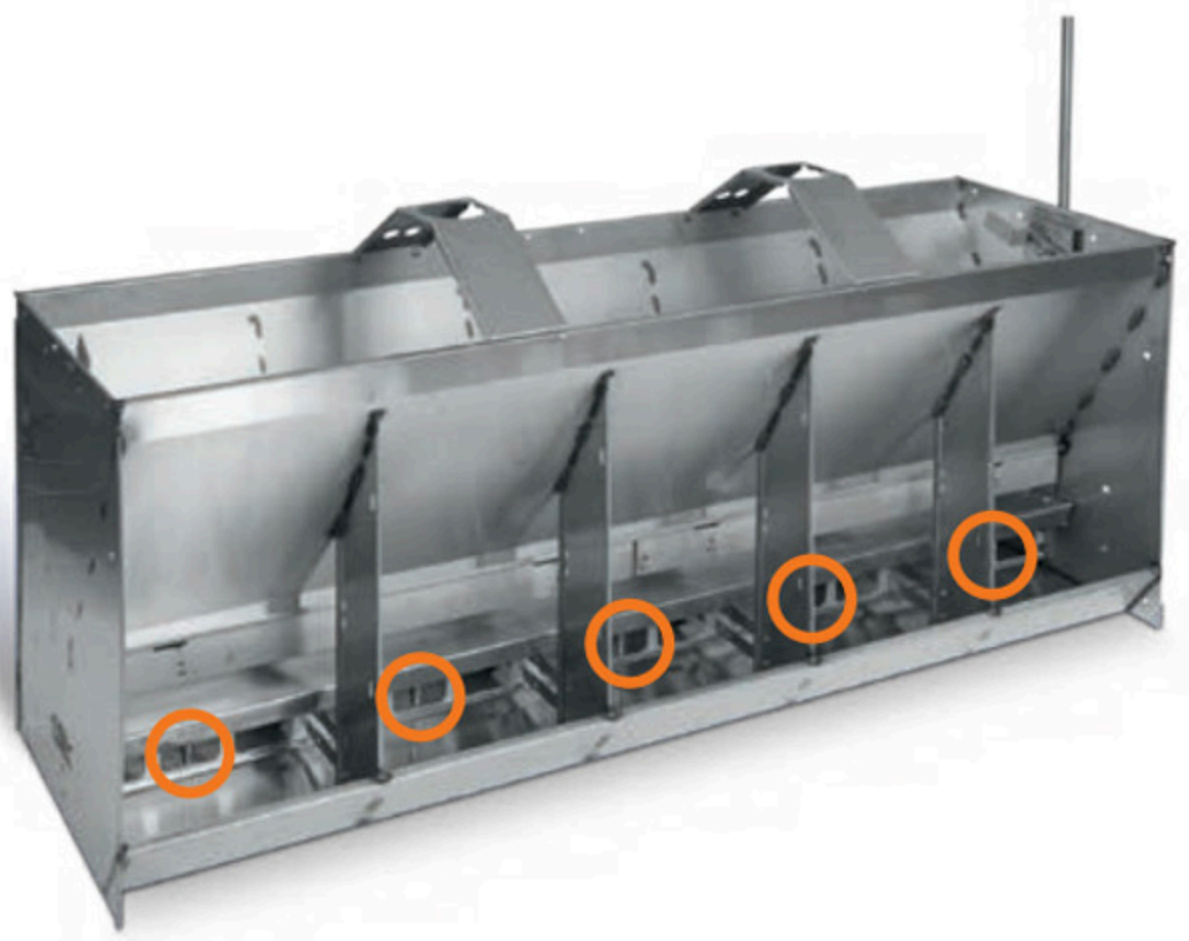

**For finishing**

- ✓ with 2 to 5 feeding places arranged on one or on both sides (2 to 10 feeding places in total).

## DryWet feeder for finishing and wean-to-finish

The DryWet feeder is available in two versions. It can be used from weaning (6 kg) to the final finishing stage, i.e. wean-to-finish, and as a feeder for finishing only. The pigs are always offered two options for feed intake: either dry or wet (with an integrated drinker line).

- ✓ height-adjustable feed table;
- ✓ 2 to 6 feeding places arranged on both sides (4 to 12 feeding places in total);
- ✓ every feeding place is equipped with a drinking nipple which can be accessed from both sides;
- ✓ an additional extension increases storage space for feed;
- ✓ entirely made of stainless steel;
- ✓ available as welded or screwed version;
- ✓ height: 780 mm; with extension: 930 mm.
